CAT5 & CAT5e CABLE

Applications

Cat5 Ethernet cable is widely used for connecting all manner of devices on local networks. It is also commonly found supporting incoming internet or broadband connections.

Typical uses of Cat5 cable include numerous LAN (Local Area Network) applications, such as connecting multiple computers to form a network of linked devices in reasonable proximity.

Many hubs, switches, and routers found in schools, colleges, offices, hospitals, and other workplaces will primarily be using Cat5 cable connections for the bulk of their data transfer activity.

Other standard applications include hooking up a wide range of indoor telephone, video, audio/speaker, and CCTV systems.

Construction

Conductor : Annealed Bare Solid Copper Conductor
23 AWG & 24 AWG

Insulation : HDPE

Sheath : PVC/HR-PVC/LSZH/FRLS

Type : Shielded or Unshielded

Shield : Aluminum Mylar (Foil) tape screen with tinned copper drain wire. Individual Shielding or Overall Shielding (If Applicable)

Options : Double Sheath for Outdoor/Wire Armoured/Aramid Yarn Strength/Water Blocking Tape

CAT6 & CAT6a CABLE

Applications

In most cases, Cat6 cable is used for connecting a computer to another device like a hub, router or switch in order to allow the sharing of files across a network or for accessing the Internet.

It can also be used for connecting computers to other devices together such as printers or scanners, or for incoming and outgoing LAN connections on patch panels. With the potential for higher speeds and less crosstalk, Cat6 cable currently dominates home and enterprise networks as the cable of choice.

Construction

Conductor : Annealed Bare Solid Copper Conductor
23 AWG & 24 AWG

Insulation : HDPE **Separator :** LDPE

Sheath : PVC/HR-PVC/LSZH/FRLS

Type : Shielded or Unshielded

Shield : Aluminum Mylar(Foil) tape screen with tinned copper drain wire. Individual Shielding or Overall Shielding (If Applicable)

Options : Double Sheath for Outdoor/Wire Armoured/Aramid Yarn Strength/Water Blocking Tape

CAT6 & CAT6a DOUBLE COVER CABLE

Construction

Conductor : Annealed Bare Solid Copper Conductor
23 AWG & 24 AWG

Insulation : HDPE

Inner Sheath : PVC/HR-PVC/LSZH/FRLS

Type : Shielded or Unshielded

Options : Double Sheath for Outdoor/Wire Armoured/Aramid Yarn Strength/Water Blocking Tape

Separator : LDPE

Outer Sheath : PVC/HR-PVC/LSZH/FRLS

CAT6 & CAT6a ARMOURED CABLE

Construction

Conductor : Annealed Bare Solid Copper Conductor
23 AWG & 24 AWG

Insulation : HDPE

Inner Sheath : PVC/HR-PVC/LSZH/FRLS

Armour : Round GI Wire or Aluminium Wire

Options : Double Sheath for Outdoor/Wire Armoured/Aramid Yarn Strength/Water Blocking Tape

Separator : LDPE

Outer Sheath : PVC/HR-PVC/LSZH/FRLS

Type : Shielded or Unshielded

CAT6 FLAT CABLE

Construction

Conductor : Annealed Bare Solid Copper Conductor
23 AWG & 24 AWG

Insulation : HDPE

Sheath : PVC/HR-PVC/LSZH/FRLS

CAT7 CABLE

Applications

CAT7 cable is intended to support much higher frequencies of signals than the CAT5e and CAT6 cables.

CAT7 Ethernet cables (LAN cables) are used to connect modems, hubs, and individual computers on networks of all shapes and sizes.

Commercial and Industrial Applications:

CAT7 cables can withstand various hazards, including temperature extremes, UV/moisture exposure, and direct contact with different chemicals and oils.

Domestic Applications:

Cat7 cables have become increasingly popular with home users across a wide range of domestic CAT7 LAN cable networks and connectivity setups, in addition to enthusiast gaming setups.

Construction

Conductor : Annealed Bare Solid Copper Conductor
23 AWG & 24 AWG

Insulation : HDPE **Separator :** LDPE

Sheath : PVC/HR-PVC/LSZH/FRLS

Type : Shielded and Braided

Shield : Aluminum Mylar (Foil) tape screen with tinned copper drain wire. Individual Shielding or Overall Shielding

Options : Double Sheath for Outdoor/Wire Armoured/Aramid Yarn Strength/Water Blocking Tape

Note : Customised Solutions available on request

UNITUBE UNARMOURED OFC UPTO 12F

Construction

Fibre : Single Mode G.652D

Packing : Coil upto 2500 Mtr., Drum above 2500 Mtr. upto 6000 Mtr.

Strength Member : FRP Rod (0.80 mm/1.00 mm)

Loose Tube : PBT Loose Tube with Jelly

Outer Sheath : UV Proof HDPE

Colour Coding - Fibre

FIBRE COUNT	NOMINAL DIAMETER (mm)	NOMINAL WEIGHT (Kg/Km.)
UPTO 12F	6.0 mm \pm 0.2 mm	40 Kg.

TENSILE STRENGTH (N)		BENDING RADIUS (mm)		TEMPERATURE RANGE	
INSTALLATION	OPERATING	TEMPORARY	PERMANENT	INSTALLATION	OPERATING
1000	500	15 X D	20 X D	-10° to +50° C	-40° to +70° C

UNARMOURED OFC UPTO 24F

Construction

Fibre : Single Mode G.652D

Packing : Drum upto 6000 Mtr.

Strength Member : FRP Rod (1.00 mm)

Loose Tube : PBT Loose Tube with Jelly

Outer Sheath : UV Proof HDPE

Colour Coding - Fibre

FIBRE COUNT	NOMINAL DIAMETER (mm)	NOMINAL WEIGHT (Kg/Km.)
UPTO 24F	9.0 mm \pm 0.5 mm	60 Kg.

TENSILE STRENGTH (N)		BENDING RADIUS (mm)		TEMPERATURE RANGE	
INSTALLATION	OPERATING	TEMPORARY	PERMANENT	INSTALLATION	OPERATING
1000	500	15 X D	20 X D	-10° to +50° C	-40° to +70° C

* For Fibre count more than 12F, bundles in multiple of 12F will be formed with color identification binder (Blue, Orange)
